**Circular No: 15/2022-23**

**6<sup>th</sup> October, 2022**

**Sub:** Advisory for export of Spices & Spice products to Morocco -reg

**Ref:** Spices Board Circular No. 06/2022-23 dated 10<sup>th</sup> June, 2022

\*\*\*\*\*

In continuation to the Spices Board circular No.06/2022-23 dated 10<sup>th</sup> June, 2022, Spices Board has been informed by the Embassy of India, Rabat, Kingdom of Morocco that Office National de Sécurité Sanitaire des Produits Alimentaires (ONSSA) Morocco is working to formulate guidelines on Diethyltoulamide (DEET) and there will not be any issue for export of food products from India on account of DEET, till the guidelines are formulated.

Further, ONSSA has informed that, with regard to Pesticide MRLs, the limits prescribed in the Order issued by the Govt. of Morocco in 2014, shall be complied with. An unofficial translation of the order is attached. The same can be accessed from the link: [https://gain.fas.usda.gov/Recent%20GAIN%20Publications/Pesticide%20MRLs\\_Rabat\\_Morocco\\_8-31-2018.pdf](https://gain.fas.usda.gov/Recent%20GAIN%20Publications/Pesticide%20MRLs_Rabat_Morocco_8-31-2018.pdf)

In this regard, all exporters of spices and spice products are advised to take note of the information provided by ONSSA, exercise due diligence and to take necessary steps to ensure that spices and spice products exported to Morocco complies with the MRLs and other standards prescribed by the Govt. of Morocco.

**Report Highlights:**

This report contains an unofficial translation of Morocco's [Order No. 156-14](#), setting pesticide MRLs in primary products and foodstuffs. Morocco's intent of this measure, as stated in [G/SPS/N/MAR/30](#), was to harmonize with the corresponding European directive. The measure touches Moroccan imports, valued at \$2.5 billion, 10% of which comes from the United States and covers 60% of U.S. agricultural exports to Morocco.

**Joint Order of the Minister of Agriculture and Maritime Fisheries and the Minister of Health [No. 156-14](#) of the 15 Rabia I 1435 (17 January 2014) fixing the maximum limits of residues in or on primary products and food products.**

**[\(BO No. 6322bis from 01/01/2015, page 238\)](#)**

**The Minister of Agriculture and Maritime Fisheries,  
The Minister of Health,**

Having regard to [Decree No 2-10-473 of the 7 Chaoual 1432](#) (6 September 2011) taken for the application of certain provisions of the [Law No 28-07](#) relative to the safety of food products, particularly article 53, 4);

**ORDER:**

**First Article.** - For the purposes of this Joint Order, the following definitions shall apply:

- **Phytosanitary products:** any pesticide product for agricultural use as defined in Article 1 of [Law No. 42-95](#) on the control and organization of Trade in Agricultural Pesticide Products promulgated by [Dahir No. 1-97-01 of 12 Ramadan 1417](#) (21 January 1997) as amended and supplemented;

- **Residue of phytosanitary products:** any substance identified as a plant protection product in primary products or food products. This term includes all plant protection product derivatives, such as conversion and reaction products, metabolites and impurities of toxicological significance.

- **Maximum limit of residues of a phytosanitary product (MRLs):** the maximum concentration of residues of a plant protection product approved or authorized in accordance with the relevant legislation and regulations, present in or on primary products or food products;

- **Limit of determination:** the lowest concentration of residues that can be measured and recorded by regular monitoring of the level of residues, using recognized analytical methods.

**Article 2.** - The list of primary products and food products for which maximum levels of pesticide residues may be established is set out in Annex I to this Order.

Pesticides and their maximum residue on or in primary plant products and food products of plant origin mentioned in Annex I to the above-stated are fixed in Annex II of this Order.

Pesticides and their maximum residue limits on or in primary animal products and food products of animal origin referred to in Annex I above specified are fixed in Annex III of this order.

The provisions of this Article do not apply to plant protection products which do not require the fixing of a maximum residue limit for those products.

**Article 3.** - Where primary products or food products listed in Annex I of this Order, for which no MRL is provided for in Annex II or III to this Order, are imported, the MRL applicable to these products is that established by the Codex Alimentarius.

In the absence of a maximum residue limit established by the Codex Alimentarius, the products must be submitted, at the request of the importer, to a risk assessment by the National Food Safety Authority, on presentation of the a technical file including the results of the "residue tests" carried out and the toxicological data enabling the maximum residue limit applicable.

These maximum residue limits shall be included in Annexes II or III as appropriate.

**Article 4.** - In all cases, residues of plant protection products, on or in the primary products and food products listed in the above-mentioned Annex I, for which an MRL is not fixed in Annex II or III of this Order or in accordance with to the provisions of Article 3 above shall not exceed 0.01 mg / kg or the limit of determination defined in Article 1 above.

**Article 5.** - Article 3 of the [Decree of the Minister of Agriculture and Agrarian Reform No. 1809-89 of 13 July I 1410](#) (13 December 1989) on the sale and use of deltamethrin and piperonyl butoxide for disinfection of grain seeds, is repealed.

**Article 6.** - This order will be published in the Official Bulletin.

**Rabat, the 14 Rejeb 1435 (May 14, 2014)**

**The Minister of Agriculture and Maritime Fisheries, Aziz AKHANNOUCH**  
**The Minister of Health, El Houssaine LOUARDI**

(1) The scientific name of the products in the column "Examples of products in the group to which the MRLs apply" is indicated

(2) The term "other" covers all products that are not specifically mentioned in the "groups to which the MRLs apply".

(3) The MRLs listed in Appendices 2 and 3 for this product are applicable to this product only when used in the human food.

(4) If the pesticide and / or metabolites (included in the definition of residues) are water-soluble ( $\log Pow < 3$ ), the MRL is expressed in mg / kg of meat (including fat), meat preparations, offal and animal fat. If the pesticide and / or metabolites (included in the definition of residues) are fat-soluble ( $\log Pow \geq 3$ ), the MRL is expressed in mg / kg fat contained in meat, meat preparations, offal and fats animal. For foodstuffs with a fat content equal to or less than 10% by weight, the quantity of residues refers to the total weight of the boned foodstuff. In this case, the maximum level is one-tenth of the value expressed in relation to the amount of fat, but it must be at least 0,01 mg / kg. This last rule does not apply to cow's milk or whole cow's milk. It also does not apply to other products when the MRL is set at the level of the LO.

(5) If the pesticide and / or metabolites (included in the definition of residues) are water-soluble ( $\log Pow < 3$ ), the MRL is expressed in mg / kg of milk and milk products. If the pesticide and / or metabolites (included in the definition of residues) are fat-soluble ( $\log Pow \geq 3$ ), the MRL is expressed in mg / kg of cow's milk and whole cow's milk. In order to express the residue content of raw cow's milk and whole cow's milk, the calculation should be based on a fat content of 4% by weight. For raw milk and whole milk of another animal origin, residues are expressed on the basis of fat. For other listed foods with a fat content of less than 2% by weight, the maximum level is one half that for raw milk and whole milk, and for those with an equal fat content or greater than 2% by weight, the maximum level is expressed in mg / kg of fat. In this case, the maximum level is twenty-five times that applied to raw milk and whole milk. This last rule does not apply when the MRL is set at the LD level.

(6) If the pesticide and / or metabolites (included in the definition of residues) are water-soluble ( $\log Pow < 3$ ), the MRL is expressed in mg / kg of fresh eggs shelled for bird eggs and egg yolks . If the pesticide and / or metabolites (included in the definition of residues) are fat soluble ( $\log Pow \geq 3$ ), the MRL is expressed in mg / kg of fresh eggs shelled for bird eggs and egg yolks. However, for eggs and egg products with a fat content of more than 10%, the maximum level is expressed in mg / kg fat. In this case, the maximum level is ten times that for fresh eggs. This last rule does not apply when the MRL is set at the LD level.

(7) MRLs do not apply as long as each product is not determined and registered in the list."
